HURAN TUNC

Senior Quality Test Engineer II | Salesforce, API Testing and Test Automation

Enfield, London | 07398 855066 | hurantunc@gmail.com

PROFILE

Senior QA professional who began testing in 2009, with experience across Salesforce, financial services, content management, mobile applications and fraud detection. I combine hands on manual testing with practical automation and API testing, and I am comfortable working from early requirements through integration, regression and release. In my current role at Elsevier, I test Salesforce Quote to Cash functionality supporting open access agreements, quoting, credit notes and billing. I work closely with product owners, analysts and developers to clarify acceptance criteria, investigate defects and protect the quality of each release. I also support accessibility testing, improve regression coverage and help other testers build their confidence with tools and testing techniques.

CORE STRENGTHS

- Salesforce and Quote to Cash
- Copado Robotic Testing
- Robot Framework and Python
- Accessibility and cross browser testing
- Manual, regression and end to end testing
- API and integration testing
- Test planning and defect investigation
- Agile delivery and team collaboration

PROFESSIONAL EXPERIENCE

Senior Quality Test Engineer II | December 2019 to Present

Elsevier Ltd | London

Part of the Quote to Cash BAU team within Elsevier's sales technology group, testing Salesforce functionality for the Open Access Salesforce programme. The platform supports open access agreements, quoting, rebilling and billing.

- Own QA activities for Salesforce stories, from reviewing requirements and acceptance criteria to executing tests, documenting evidence and supporting release decisions.
- Test business rules and data integrity across agreements, account agreement period balances, quotes, rebilling and credit note processes.
- Investigate differences between QA and SIT, including profile and permission set behaviour, record visibility and environment configuration, and work with developers to identify the cause.
- Build and maintain regression automation using Copado Robotic Testing, Robot Framework and Python, with a focus on reliable, reusable test flows and reducing repetitive manual effort.
- Create and run API checks with Postman and Insomnia, validating requests, responses, error handling and data exchanged between Salesforce and connected systems.
- Support Salesforce data setup and verification, including API based queries and upserts, external identifiers and checks designed to avoid duplicate test records.
- Carry out accessibility checks using tools such as NVDA, WAVE and HeadingsMap, alongside keyboard navigation, screen reader and browser zoom testing.
- Coordinate cross browser testing through BrowserStack and investigate blockers such as authentication and multi factor authentication issues.
- Work with developers, analysts and delivery colleagues during refinement, stand ups and defect triage to clarify expected behaviour and agree practical fixes.
- Share testing knowledge with colleagues and help improve team practices around automation, test evidence and release readiness.

QA Analyst | October 2018 to November 2019

Featurespace Ltd | Cambridge

Tested ARIC, a real time fraud detection and behavioural analytics product, across Windows and Linux environments.

- Performed functional and exploratory testing, raising defects and following them through to resolution.
- Used SoapUI for API testing and JMeter for performance checks.
- Maintained test cases as features changed and worked with developers in an Agile team to improve test coverage and feedback.

Quality Assurance Engineer, Contract | July 2017 to July 2018

Foundation Home Loans | Bracknell

- Tested the company's digital loan application process, covering functional modules, interfaces and integrations.
- Created and executed test plans and scripts, recorded results and raised defects with clear supporting evidence.
- Reviewed design documents, change requests and acceptance criteria, turning requirements into practical test scenarios.
- Built Excel matrices and calculations to support test data preparation and validation.

PROFESSIONAL EXPERIENCE CONTINUED

Quality Assurance Engineer | February 2012 to July 2017
Alfresco Software Ltd | Maidenhead

Sole mobile tester for Alfresco's iOS and Android applications, testing apps built on the Objective C and Java SDKs. The products were used in customer environments with mobile device management platforms, making security and device compatibility important parts of the work.

- Planned and delivered testing throughout the development lifecycle, including test strategies, plans, scenarios, cases and release summaries.
- Created and maintained automated mobile tests using TestPlant and Appium, writing Java based scripts and defining the automation approach.
- Tested application behaviour across devices and configurations, including integrations with mobile device management platforms such as Good Technology, Symantec and MobileIron.
- Reported and tracked defects in Jira, provided test estimates and status updates, and worked with developers to prioritise fixes.
- Contributed to daily scrums, sprint planning, retrospectives and release readiness meetings.

TECHNICAL SKILLS

Salesforce and delivery: Salesforce, Quote to Cash, permission sets, data validation, Agile and Waterfall
Automation: Copado Robotic Testing, Robot Framework, Python, Appium, TestPlant, Selenium
API and performance: Postman, Insomnia, SoapUI, JMeter, REST API testing
Testing: Manual testing, regression, integration, end to end, accessibility, mobile and cross browser testing
Platforms and data: Java, Linux, AWS, Athena, Snowflake, MySQL
Tools: Jira, TestRail, TestLink, TFS, TeamCity, YouTrack, Eclipse, BrowserStack

CERTIFICATIONS

- Copado Robotic Testing Certification
- API Testing Certification, including Insomnia
- Web Accessibility, Deep Dive
- CompTIA A+ Essentials
- CompTIA A+ IT Technician
- MCP Windows XP Professional

EDUCATION

BSc Computer Science | University of Hertfordshire, 2009

ADDITIONAL INFORMATION

Fluent in English and Turkish. Full UK driving licence.
